

A quick guide to the Poynt ecosystem.

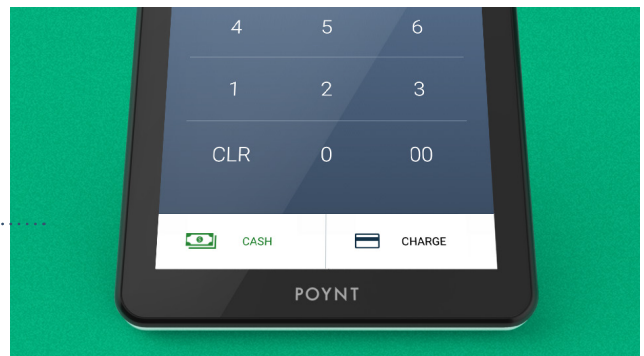

The first payment terminal you'll love, and the last one you'll need.

Paying with credit cards is faster and easier, with **a single slot for both mag stripe and chip cards**, plus an **NFC reader for Apple Pay, Android Pay, Samsung Pay**, and everything else.

There's a big beautiful touch screen for you – plus a dedicated screen for your customers.

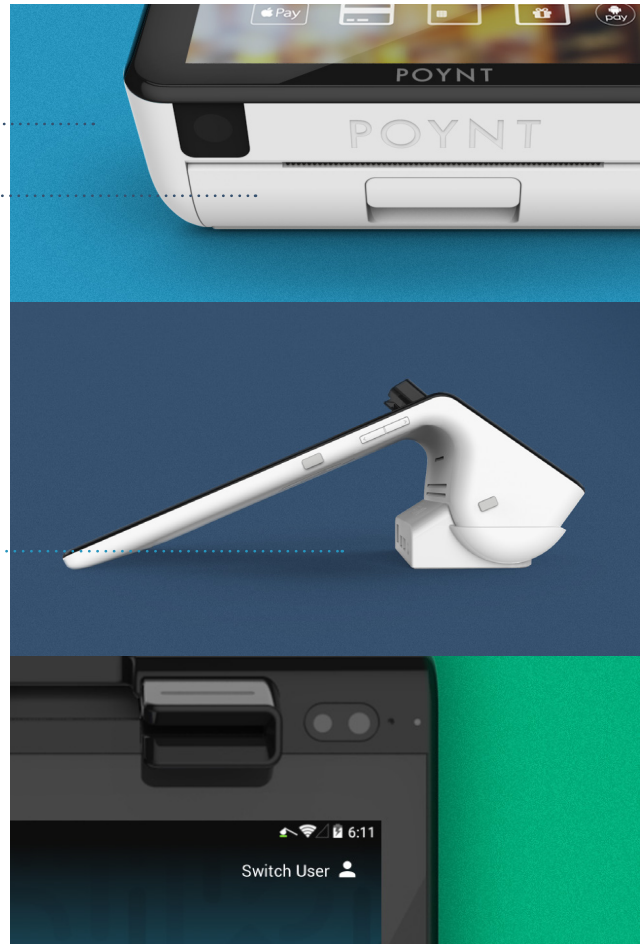

Customers can select their **receipt preferences** (print, email, none), **choose a tip** (without all the awkwardness), and **digitally sign** or **enter pin** for their transaction (if applicable).

Designed to fit on any counter-top and works as a mobile solution too.

The Poynt Smart Terminal comes with a **built in scanner and printer**, but can also connect to your existing cash drawers, scanners, registers – whatever via USB on the docking station, so you can do business however you like to.

Poynt also comes with **WiFi and 3G options**, so you can make transactions from anywhere.

And it's way more than just a terminal.

Poynt is also a smart tablet with other cool apps and features – like a register app, clock-in clock-out, loyalty cards, QuickBooks sync, and more.

And Poynt keeps getting new apps all the time.

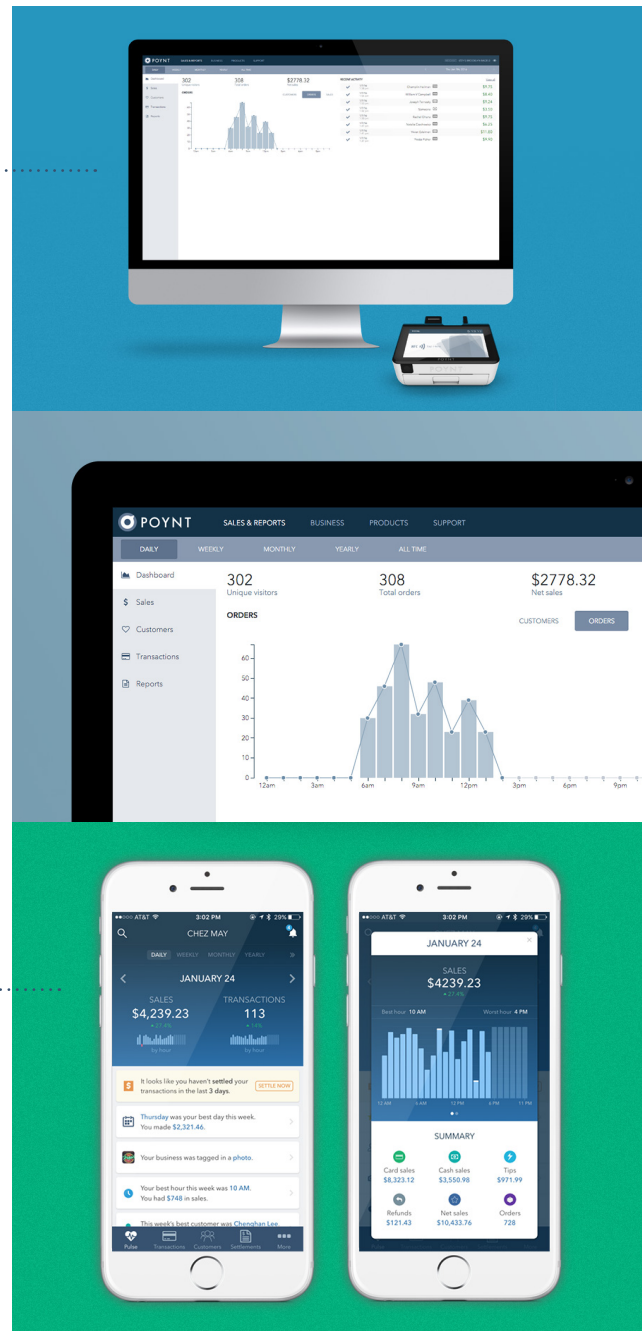

Poynt HQ—a remote control for your business—comes free with Poynt.

Poynt HQ is a command center for your business

where you can monitor your sales, refund transactions, get business insights and alerts, see your best customers, settle with one click — plus a ton more.

And with the **Poynt HQ App for your phone**, you can do all this from anywhere. That's the beauty of having smart technology.

And if you need help, **there's a help app right on the home screen**. Because great technology deserves great support.
